SKILLS

- Language, and Framework: Dart, and Flutter
- Software: Figma, Firebase, Git
- Operating Systems: Android, iOS, Windows, and Linux
- Languages: English – Fluent, and Spanish - Fluent

PROJECTS

weatherApp

Utilizing Open Weather Map API, to provide a list of Cities, and then the coordinates, while saving the searches to the device, with the Shared Preferences plugin.

chatRoomApp

Utilizing Firebase services, such as Firestore as the database, to log in using Gmail. Thus being able to check out the chatrooms, send, and receive messages, even a "Giphy"! While saving users' profile pictures in storage.

fruitWar

Utilizing the Shared Preferences plugin to save the theme, and the memory game high-scores. Along with the Lottie plugin that parses the Adobe After Effects reward JSON, in the intro, and the Confetti plugin celebrating the user's win!
